By this Amendment, Applicants Attorney has amended each of the independent claims of the application to make it clear that processing the 3-D and 2-D data in combination requires thresholding at least a portion of each of the 2-D and 3-D data to obtain respective 2-D and 3-D threshold data, combining the 2-D and 3-D threshold data to identify a set of data which corresponds to an overlapping image region of the 2-D and 3-D threshold data and locating at least one of a lead, an endcap and a component feature using at least a portion of the set of data.

Clearly, none of the art of record taken either alone or in combination with one another teach such processing.

Consequently, in view of the above and in the absence of better art Applicants' Attorney respectfully submits the application is in condition for allowance which allowance is respectfully requested.

Respectfully submitted,

**John J. Weisgerber, et al.**
